4/5# Medium Cheddar Cheese Shredded

- I. **Description:** Medium Shredded Cheddar Cheese is made from pasteurized milk, or “heat shocked” milk, from cows not treated with the artificial growth hormone rBST. Cultures, enzymes, and annatto (color) are added. The curds produced undergo a cheddaring and milling process, are salted, and pressed into 42-pound blocks. Cheese that is made from heat shocked milk requires aging for a minimum of 60 days. After aging a minimum of 60 days, the cheese is graded, shredded, potato starch is added to prevent caking, and natamycin (natural mold inhibitor) is added to retard mold growth, and packaged. This process meets legal requirements as set forth in 21 CFR 133.113.
- II. **Specifications:**
- Appearance:** Medium Cheddar cheese shall have an attractive color and appearance; practically free from excessive amounts of potato starch. Small amounts of fine granulated cheese may be found. Absolutely no extraneous matter of any type or amount permitted.
- Body and Texture:** The cheese shall be firm, appear smooth, compact, close and slightly flexible. May have few mechanical openings if not large and connecting. Shall be free from gas holes, and large slits - cracks.
- II. **Flavor and Aroma:** A characteristic Tillamook cheddar flavor and aroma for the associated age; medium, sharp, extra sharp. Shall be free from any undesirable flavors and odors.
- III. **Nutrition:**
- Serving Size:** 28g (1/4 cup)
