

22 December 2025

**Absence of Synthetic Treatments in Products**

Inline Plastics Corp.'s packaging products are manufactured from PET (polyethylene terephthalate) material and are suitable for direct food contact in accordance with applicable U.S. Food and Drug Administration (FDA) regulations. All materials used in the manufacture of these products comply with relevant FDA food-contact requirements.

The products are not treated with synthetic fungicides, fumigants, preservatives, or pesticides, and no nanotechnology is intentionally used in the manufacturing process.

The products are recyclable through curbside recycling programs where such programs exist and may be recycled into new foodservice packaging, subject to applicable recycling regulations and processes. Inline Plastics Corp. designs its products for their intended foodservice applications in compliance with applicable regulatory and performance requirements, using no more material than is necessary to ensure functionality and product integrity.

This declaration is continuous and shall remain in full force and effect unless revoked in writing. This version supersedes all previous declarations or certificates that may otherwise be in effect.

Sincerely,

A handwritten signature in black ink that reads 'Julie A. VanBennekom'.

Julie VanBennekom
