

QUICK START GUIDE

FOOD MILL

MODELS

181FM5XL - 5 qt. (Includes 3, 6, and 8mm Sieves)

181FM8XL - 8 qt. (Includes 3, 6, and 8mm Sieves)

SAFETY INSTRUCTIONS

CAUTION

Be careful when handling, operating, and cleaning the food mill. Keep hands clear of blades when in use.

OPERATION

- Place the food mill on the container that will be used to collect the milled produce.
 - Both food mills will fit a variety of stock pot sizes if only 2 of the hooks are used.
 - 5 qt. food mill is designed to fit 12 qt. stock pots using all 4 hooks.
 - 8 qt. food mill is designed to fit 20 qt. stock pots using all 4 hooks.
- Place cooked fruits or vegetables in the food mill.
- Crank the food mill handle to press the cooked fruits and vegetables through the sieves into the container.

CLEANING

- Disassemble food mill.
- Hand wash all food mill components in warm water with a mild soap solution. Avoid using abrasive sponges or rags.
- Rinse with warm water.
- Let air dry before re-assembly.

ASSEMBLY

- Place desired sieve within food mill circular rim. There is a notch that locks the sieve into place.
- Unlock latches on the sides of the food mill rim.

- Place food mill handle assembly into the food mill. Insert the food mill handle assembly rod into the hole in the center of the sieve.
- Attach food mill handle assembly to food mill rim by locking the handle in place using the latches and attached brackets.
