Refrigerator

### Over 2400+ models and growing...

During this past decade, we've experienced extraordinary growth and change here at Continental Refrigerator, thanks largely to our continued commitment to teamwork, technology-focused product strategies and to our policy of placing customer satisfaction above all else. We've successfully reached key milestones, increased research and development initiatives and achieved significant technological advancements. Even in the face of challenging economic conditions, we're finding new ways to take advantage of the evolving industry landscape to ensure Continental Refrigerator remains your number one choice for commercial refrigeration.

The upcoming years will be exciting as we continue to broaden our business efforts and move from promise to product. We've set increasingly ambitious goals for ourselves, but we have the intense vision and resources to achieve them. We have the knowledge, experience and expertise to bring specialty products to market, and we know the steps we need to take are simply an extension of what we have been doing successfully since our inception. Simultaneously, we plan to continue responding to market challenges and expand our lines of refrigeration equipment with products boasting enhanced feature sets and ENERGY STAR qualification in order to engage a wider customer base. Consequently, we have set an aggressive timeline for the development of new products to fulfill our commitment to the foodservice industry.

We take pride in knowing what our customers demand and embrace it as a philosophy for our operations and planning. We know the "real world" operations of commercial kitchens and build that knowledge into every unit we make. That's why we engineer to a higher standard, by testing all our equipment in 100°F, exceeding the standard of 86°F and customizing our standard product line to create flexible solutions for a variety of kitchen applications.

I praise each of our employees for making these past years such an exhilarating success, even in turbulent times. I would also like to extend my thanks to our customers and our suppliers for their unfailing sense of devotion, responsibility, guidance and support.

#### **Your satisfaction is our number one priority!**

Sincerely,

Brian P. Kelly  
*President*

Easy glide, fully extendable drawers hold 6" deep pans side-by-side

Capillary dial thermometer

Drip guard marine edge

**Easy glide, fully extendable drawers designed to hold 6" deep pans side-by-side and hold up to 250 lb. capacity.**

Continental's Refrigerated Griddle Stands are available in 7 sizes for refrigerators and 4 sizes for freezers. All models are front breathing and come standard with stainless steel interior, exterior and rear. All drawers are fully extendable and designed to hold 6-inch deep pans side-by-side and provide a 250-lb. capacity. Heavy-duty drawer tracks have built-in drawer safety clips. All cabinets have the option of a left or right condensing unit.

BTU/HR Rating @ +25°F, 90°F ambient (refrigerators)

BTU/HR Rating @ -15°F, 90°F ambient (freezers)

10 ft. cord and plug attached

### Standard Features

Performance-rated  
refrigeration system

Environmentally-safe  
R-134a refrigerant (refrigerators);  
R-404A refrigerant (freezers)

High density, non-CFC  
polyurethane foamed-in-place  
insulation

**Easy glide, fully extendable  
drawers designed to hold 6"  
deep pans side-by-side**

One-piece, snap-in magnetic  
drawer gaskets

Heavy-duty drawer track  
with built-in drawer **safety clips**

**Drawers designed to hold up  
to 250 lb. capacity**

Side-mounted, automatic, energy  
saving, non-electric condensate  
evaporator

Non-corrosive, plasticized  
fin evaporator coil

Easily serviceable, front slide-out  
condensing unit

Capillary dial thermometer

Stainless steel case back

**4" casters on support plates**

Automatic electric defrost (freezers)

## Options & Accessories

Cylinder locks

Top extensions

Digital thermometer

Condensing unit left or right  
Doors in lieu of drawers (36" & 48" models only)  
Cylinder locks  
Top extensions  
Adjustable legs  
Remote models  
Digital thermometer  
Automatic, electric condensate evaporator  
Flat top in lieu of marine edge  
16-gauge stainless steel top

DL84G/DL84GF with condensing unit on left (optional)

## Drawer Pan Configurations

# Engineering, Manufacturing & Quality Control

## Superior Built Refrigeration

Continental Refrigerator engineers and builds our Griddle Stands to meet the most stringent specifications demanded by consultants and service operators. All cabinets are constructed of top quality materials and components, attributing to their genuine ruggedness and durability. Our Griddle Stands are designed with enhancements to endure everyday use in typical commercial kitchen environments.

Prior to factory shipping, all models are performance-run tested for a minimum of 12 hours, providing a highly sophisticated temperature analysis recording, exclusive to each individual cabinet. This recording is then supplied, along with the unit's operation manual, for the customer. A final leak test, vibration check, noise level and visual examination is made by our quality control team, to assure a superior product is shipped from our factory.

## Front Breathing Air Flow

Intake air is drawn through the louvers at the bottom half of the front grill, and then through the condenser coil. In cases where the rear of the unit is blocked, the air is forced to discharge through the holes at the top half of the front grill.

## Unique Air Flow

Unique forced air design utilizes fans across the back of the unit for even distribution of cold.
