Automatic Paper Towel Roll Dispenser

Mounting Instructions:

1. Find a suitable installation location that complies with applicable guidelines.
2. Locate the hardware kit that comes with the unit. It will include four screws, washers, and drywall anchors, as well as one blue key.
3. Use the blue key to open the unit by putting it into the keyhole located at the top of the unit and twisting until the front cover opens.
4. With the unit open, hold the unit against the desired mounting location and use a marking tool to mark each screw hole on the wall through the dispenser. A spirit level is included on the back plate of this unit to aid in leveling. When done, set aside the dispenser.
5. Drill holes into the marked locations and insert the drywall anchors into each hole.
6. Thread a screw through a washer and screw it into one of the drilled holes. Be sure to leave enough length for mounting the unit onto the screw. Repeat this step for each screw.
7. Mount the dispenser onto the wall by aligning the dispenser's screw holes with the screws. Slide the dispenser downward and ensure it is firmly in place.

Loading Batteries:

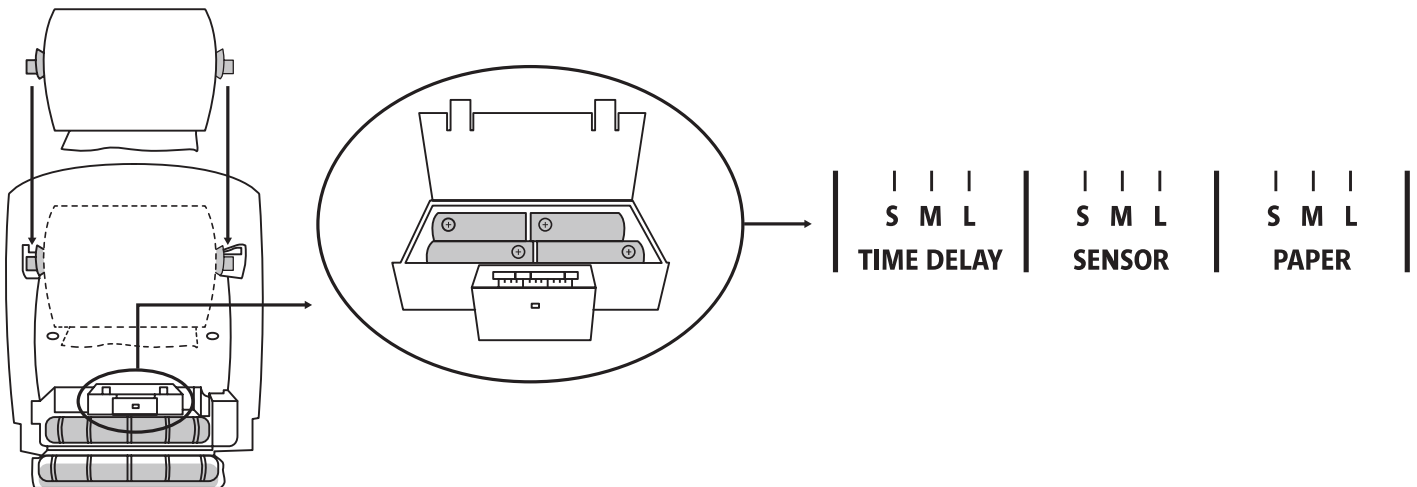

1. Before loading paper, it is recommended that batteries are loaded into the unit. Four D cell batteries (not included) are required for operation of this unit.
2. Open the unit's front cover and locate the battery housing cover—this is next to the settings control panel. Remove the battery housing cover.
3. Use the interior of the battery housing as a guide to install the batteries in the correct orientation.
4. Reseal the battery cover.

Automatic Paper Towel Roll Dispenser

Operational Features:

This unit comes with three customizable features. It is recommended that you select your desired settings before loading paper.

Time Delay:

- S – No time delay between activation.
- M – A two-second delay between activations.
- L – A four-second delay between activations.

Sensor (refers to the sensitivity required for an activation):

- S – A short range will activate the dispenser.
- M – A medium range will activate the dispenser.
- L – A long range will activate the dispenser.

Paper (refers to the length of paper dispensed):

- S – A 7 15/16" sheet will be dispensed.
- M – A 10 5/8" sheet will be dispensed.
- L – A 13 3/8" sheet will be dispensed.

Automatic Paper Towel Roll Dispenser

Loading Paper:

1. Use the picture inside the unit as a guide for which way the paper should unwind.
2. Remove the paper roll bar from the unit and insert the paper onto the roll bar. Make sure that the core of the roll is a uniform circle to ensure a good fit and an optimal dispensing experience.
3. Put the loaded roll bar onto the holding rack inside the unit.
4. Unwind enough paper to ensure it is fed through the gap below the roll bar; the paper should hang between both rows of cogs.
5. Close the cover. The dispenser will automatically feed the paper through once it is closed.

Cleaning:

A damp cloth is recommended to remove dust or other dirt when needed.
