

PURELL® CS4 Soap & Sanitizer Dispenser Installation and Use Instructions

Please read all instructions carefully before installing and using the dispenser.

Dispenser Installation

Open dispenser by pressing release buttons on the side and allow the front cover to descend forward.

Check graphic on front of dispenser before installing.
HEALTHY SOAP® = soap dispenser
HAND SANITIZER = hand sanitizer dispenser

Check label inside dispenser before installing.
CS4 SOAP = soap dispenser
CS4 SAN = hand sanitizer dispenser

Install dispenser with at least 7" free space above counter top to allow routine service.

If installing with wall fasteners

Using the dispenser as a template, pierce the tape on the back plate to mark and drill four holes using 1/4" drill bit. Use the supplied wall anchor and #10 x 1" screws to secure the dispenser in place, being careful not to over tighten. It is recommended to use 4 screws. If only two are possible, the top two holes should be used.
Recommended holes shown.

If installing with tape

Clean installation surface with an alcohol pad. Allow surface to dry for 60 seconds then peel paper off installation tape and press the dispenser firmly against the wall for 10 seconds. For maximum adhesion, wait 24 hours before loading refill or using dispenser.

Install the SHIELD™ Floor and Wall Protector into the bottom of the dispenser by aligning plastic tabs on the SHIELD with slots on the dispenser and sliding up until the tabs snap into place. (SHIELD is included with Sanitizer Systems and can be ordered for Soap systems).
