Quick and easy assembly

Adjustable within seconds

To take any size of plate

Jackstack International N.V.

**The world's fastest & most versatile preparation
serving & storage system**

Assembly instructions:

- Take the base
- Position one crossbar under the central column
- Tighten the cylinder and lock with allen key
- Fit the cylinder into the hole in the middle of the base
- Fit the second crossbar above the central column and lock with wing-nut
- Fit the four uprights between the two crossbars, arrows pointing upwards

Adjustments:

- The only correct setting is when the plates rest on all four plastic o-rings. For changing to other plate dimensions, unloose the wing-nut to the section you want to change, adjust uprights accordingly and tighten down the wing-nut again.
