

STANLEY®
COMMERCIAL

ERGOSERV® CREAMER

The **ErgoServ® Creamer** from Stanley® Commercial is the “traditional” creamer. This server can be used for coffee, but its NSF listed lid and body were designed to come apart easily for complete cleaning, making it a great choice for dairy. A variety of content indicator socks are available, including a four-pack of Cream, Milk, Skim, and Soy. Superior FerroStat® insulation retains temperature for 4-6 hours and the ergonomic handle and no-drip lip allow for a more controlled pour.

An Exclusive Partner

Service Ideas is proud to be the exclusive supplier of Stanley® Commercial Servers.
