

Capsule Coffee Urn

177CUC60

Perfect for caterers, schools, churches, and offices, this easy to use Avantco capsule coffee urn makes a large amount of coffee at one time so you can quickly serve a crowd.

This urn is designed to keep coffee hot and fresh for hours, through the entire duration of your event or meal time.

60 CUP CAPACITY

REMOVABLE LID, BREW BASKET & STEM

60 Cup Capacity

This unit boasts a 60 cup capacity, so you can always ensure that there is enough coffee to go around for your guests.

Easy Setup

Setting up this unit is a breeze thanks to its removable lid, brew basket, and stem.

Easy Operation

A simple on/off switch makes it easy to get brewing right away, and its dual-heater thermostat system will take care of the rest - brewing and holding coffee at ideal temperatures.

Sleek Design

This unit boasts a sleek design that will fit in perfectly with the rest of your coffee setup, giving it a professional look that all customers will love.

Easy Cleaning

While also attractive, the stainless steel body also makes the exterior of the unit very easy to clean. This urn also features easily removable parts to make the inside of the unit easy to access for cleaning.

Safe Transporting

Designed with safety in mind, this urn comes with a heavy-duty locking lid that prevents spills during movement, while cool-touch handles give you a place to grip the urn safely.

Overheat Protection

Thanks to its thermal limiter with an auto reset limit on, this coffee machine urn helps prevent boil dry accidents. A thermal fuse adds extra safety in case this appliance's boil dry protection fails, shutting off the appliance to give you peace of mind that even during busy shifts you can count on it to operate within safe parameters.

Convenient Sight Glass

This urn comes with a convenient exterior sight glass so that you can easily tell when it's time to brew more coffee.

Convenient Indicator Lights

Indicator lights let you know when the urn is heating and when it has switched to "keep warm" mode.

Maximum Fill Line

Each unit has a max fill line on the inside to help prevent overfilling and accidental overflows.

Quick Access to Product Literature

For ease of use, a scannable QR code is located on the unit. This allows users to access relevant manuals, spec sheets, videos, and more online.
