

TuxHEAT™ *Innovation*

THE POWER OF THE PLATE

Our healthcare team recognized that many of our customers are struggling with **maintaining temperatures** while keeping the **integrity of their menus** throughout the delivery process to their patients and guests.

Tuxton's AlumaTux is a **proven product** to maintain heat retention, strength to stand up to the demands of commercial volume, and is one of best chip resistant products in the market. However, we understood **a new product was needed.**

We re-engineered our existing AlumaTux with a new sleeker, lighter body to create a combination of operational function, innovating technology and a modern look to create **TuxHEAT™.**

TuxHEAT™ is designed
specifically for
healthcare, with the
power of AlumaTux.

TuxHEAT™ TECHNOLOGY

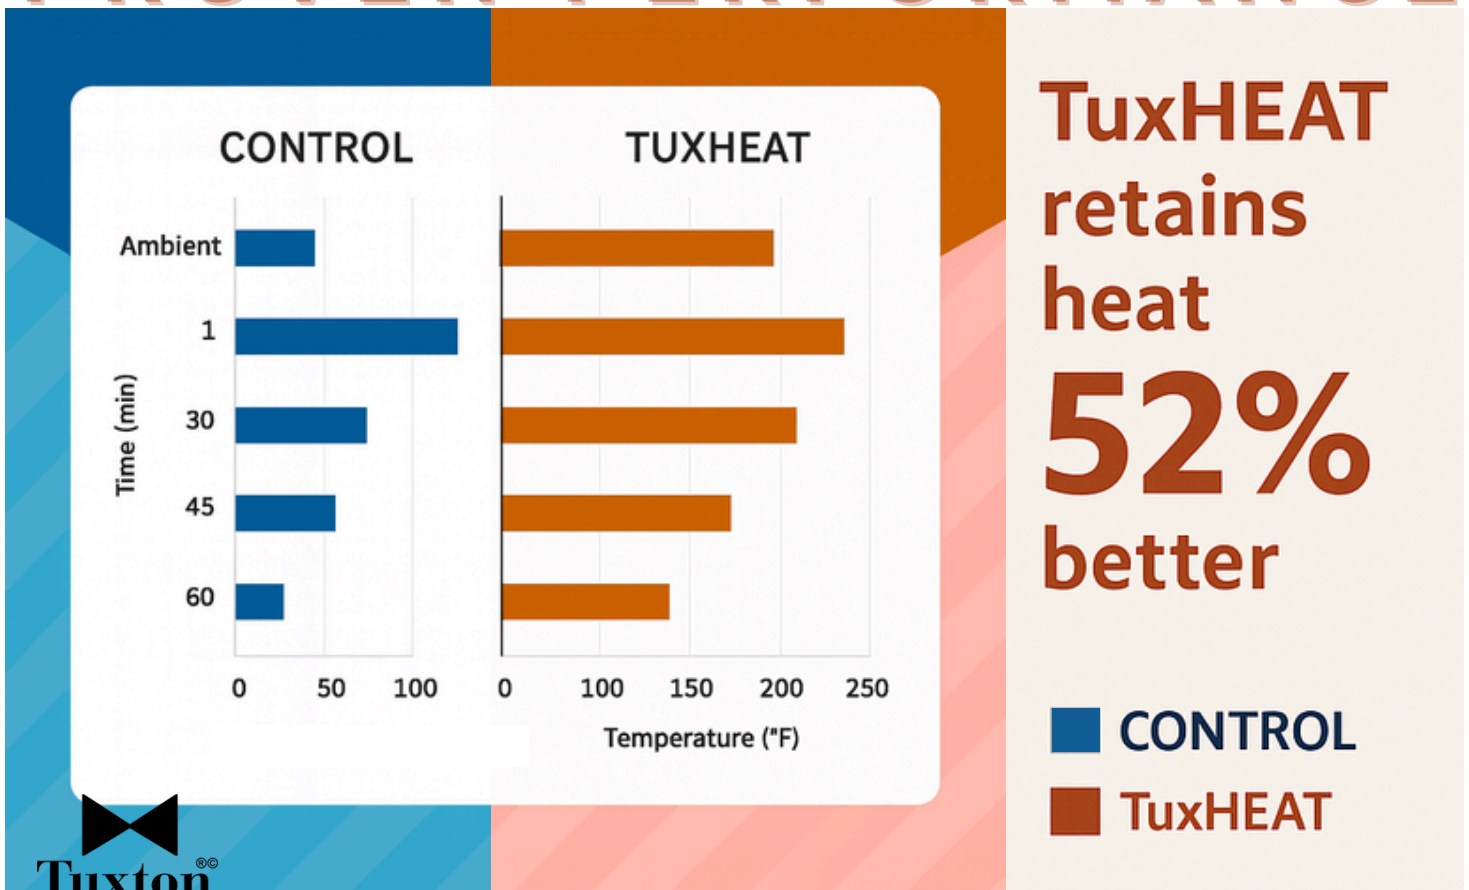

- ✓ heats quickly
- ✓ retains heat over time
- ✓ keeps heat steady/at temperature for 60mins **52% better** than standard ceramic

PLUS the same Tuxton quality you know and *love*

- ✓ sanitizer & dishwasher safe
- ✓ commercial durability
- ✓ fully vitrified for natural bacteria-resistance

PROVEN PERFORMANCE

Tested on site at Rush University Medical Center, Chicago, utilizing Aladdin Induction Bases & Domes and the regular non-select food items being served for lunch on Friday 7/11/2025

* Induction Base Hot Holding System is Designed for 45-60 Minute Holds *

** Uncontrollable Variable: large drafts of cold air in the facility due to vents being above the tray line and can effect overall temps **

** Controllable Variable: Collards & Rice both started below 155, not ideal hot holding online for maximized temps during meal delivery **
