How It Works

- The cleaning brush, in combination with Stera-Sheen Green Label, will clean easily without scratching or damaging the clear bowls.
- Exclusively approved Crathco Cleaner and Sanitizer, including all necessary components to properly maintain your equipment.
- Effective chemistry allows for: Easier labor, shorter cleaning times, less water, and fewer products needed to get the job done!

Why It's Different

- Includes a mixture of mild and safe cleaners in addition to the EPA registered sanitizer. Proven exceptionally effective on dairy soils, products with high sugar content and coffee/tea soils.
- The perfect dilution ratio: one ounce of Stera-Sheen per one gallon of water has the right amount of cleaning ability to work on all types of food buildup. Higher concentrations in other products mean less cleaning when available when diluted - not cleaning as well as the properly formulated product like Stera-Sheen.
