

The Next Generation of Back-UPS BE425M, BE600M1, BE850M2

BE600M1 shown

More Runtime: Power your critical electronics for longer than ever before; the new Back-UPS models are capable of powering your wireless networking equipment for 2 to 6 hours after safely shutting down your PC and other high powered devices.

More Battery Backup Outlets: Power more of your critical electronics during a power outage; the new Back-UPS have more outlets than ever before.

Outlet Spacing: Wide outlet spacing allows you to connect bulky transformers without covering other outlets.

Smaller and Lighter: The new Back-UPS is smaller and lighter than previous models, allowing you to easily relocate and position your UPS in any environment.
