

## Bar Guard

### PERSONAL SAFETY PARTITIONS

Safely separate patrons at bar or counter seating, allowing you to safely accommodate additional guests while protecting against the spread of germs and viruses when seated next to each other.

### Increase Seating Capacity

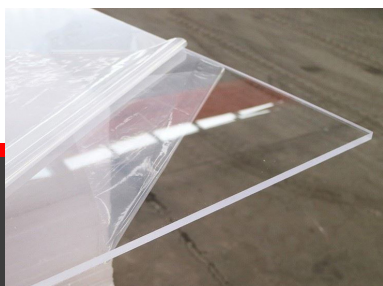

Placing vertical Bar Guards between seats at your bar or counter eliminates the need for 6-foot spacing, increasing your safe capacity at your bar seating area.

### Easy-to-Move Design

Whether you've got an individual or a party of 4, our Bar Guards are easy to move to accommodate any group of individuals that request to be seated next to each other.

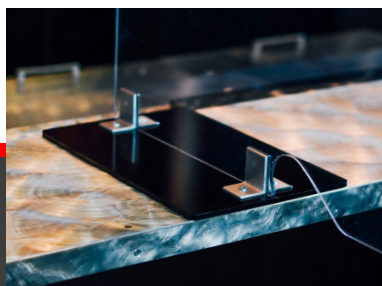

### Easy to Clean Between Guests

Our design is easy to clean between uses to make sure every guest gets a clean & comfortable experience at your bar.

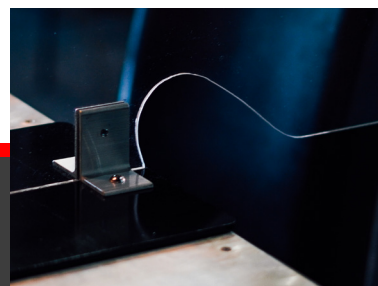

### Clear Plexiglass Shield

Our durable thick plexiglass is easy to clean, designed to provide a full barrier that is also completely transparent.

### Sturdy Mobile Base

Our Bar Guards include a 0.25" thick powdercoated steel base to support the shield and prevent tips and falls.

### Notched Design

Compatible with every bar and counter type, including those with padded bar fronts, with integrated notch cutout.

### Standard Size for Universal Application:

Goff's Bar Guard Personal Safety Partition has been specifically designed to be compatible with a wide range of bars & counters:

- 30" W x 22" H 6mm Plexiglass Vertical Partition
- 10" W x 15" L 0.25" Steel Base Plate with Rubber Feet
- Aluminum Support Brackets & Stainless Steel Hardware
- Notch to accommodate most bar or counter pads/ledges.
