JETCHILL TWIN PROBE 2

INTRODUCING

JETCHILL TWIN PROBE 2

Making dry ice safe and affordable for venues worldwide, our JetChill Dry Ice System is revolutionising the way drinks are served in the hospitality industry.

Using unique, patented technology we have harnessed the power of dry ice, allowing your guests to safely drink from a bubbling, tumbling cocktail with a swirling fog effect!

Unlike typical dry ice pellets, we have created a patented dry ice snow, which is fully safe for human consumption straight away – no more waiting for pellets to dissolve!

The JetChill probe 2 revolutionises staff safety, avoiding unnecessary exposure to dry ice by removing the need to manually handle dry ice – everything is automated at the push of a button!

The future of bartending lies here, what are you waiting for?
