

## Description

- CMS Model Combination Hand & Utility Sink is constructed of 16 gauge type #304 stainless steel. The unit is fully welded, ground and polished to a brushed satin finish.
- Sink bowl and utility sink is one piece fully coved unit pitched to individual drains.
- The upper sink is used for hand-washing and for small tools or accessories.
- Lower utility/pot sink is used for cleaning cans/containers, buckets or ware/utensil containers individually.
- Plumbing connection via removable side panel to a ½" NPT. Upper and lower sink both feature a 1½" drain.
- Ideal for tight spaces. A true space saving unit

The unit is mounted on 16GA S/S 1 5/8" legs with adjustable feet for easy leveling.

Provided with a removable stainless steel grating constructed from 1" bars and 1/2" rods.

The upper sink is used for hand-washing and for small tools or accessories.

Lower utility/pot sink is used to fill water for use throughout the facility

Upper sink faucet is a dual control single deck type unit, mounted with a swing spout.

Lower sink faucet is a swivel hose pot filler type with vacuum breaker.

A removable side panel allows access to connections and plumbing.
