

Griddle Stands

REFRIGERATORS & FREEZERS

Continental[®]
Refrigerator

INNOVATIVE DESIGNS FOR YOUR FOODSERVICE NEEDS

Griddle Stands

Refrigerator & Freezer

Griddle Stands are available in 7 sizes for refrigerators and 4 sizes for freezers. All models are front breathing and come standard with stainless steel interior, exterior and rear. All drawers are fully extendable and designed to hold 6-inch deep pans side-by-side and provide a 250 lb. capacity. Griddle Stands come equipped with heavy-duty drawer tracks that have built-in drawer safety clips.

Functionality

Griddle Stands come standard with a drip guard marine edge top, providing a cleaner and safer kitchen. *Flat top also available.*

Performance & Reliability

Performance-run tested for a minimum of 12 hours providing a highly sophisticated temperature analysis recording, exclusive to each cabinet.

FLEXIBILITY

Modifications Made Easy.

At Continental Refrigerator, we know the foodservice industry is an ever-changing environment. We are reminded of this every day through feedback from our customers, both directly and through our network of representatives. In fact, customer feedback has often lead to our custom engineering modifications becoming standard product features.

For this reason, we pride ourselves in delivering feature-rich refrigeration equipment solutions designed specifically for the commercial foodservice market. Whether it's kitchen ambient, food safety, limited space or storage challenges, our products are packed with flexible options that provide **real** operator benefits out of the box. This flexibility, a key differentiator of our products, enables our customers to modify base product features strategic to the way they operate their kitchen or bar environment.

Standard Features, Specifications & Drawer Pan Configurations

Standard Features

Performance-rated
refrigeration system

**Natural, Environmentally-safe,
high-efficiency R-290 refrigerant**
(Refrigerators)

High density, non-CFC/non-HFC
polyurethane foamed-in-place
insulation

**Smooth, polished chrome
drawer handles**

Easy glide, fully extendable drawers

One-piece, snap-in
magnetic drawer gaskets

Heavy-duty drawer track
with built-in drawer safety clips

**Automatic, hot gas
condensate evaporator**

Non-corrosive, plasticized
fin evaporator coil

Easily serviceable, front
slide-out condensing unit

Stainless steel finished worktop
with drip guard marine edge

Electronic controller w/ digital display
& hi-low alarm

Expansion valve system
(except 36" - 48" refrigerators
& 48" freezers)

4" casters on support plates

Stainless steel case back

Automatic electric defrost (freezers)

Drawer Pan Configurations

Drawer cage, easily removable in field
for servicing & cleaning

Mullion, integral to the cage

Door in lieu of drawers (D36GN & D48GN only)
 Cylinder locks
 Top extensions (flat or marine edge)
 Condensing unit on left
 Integral heat shield top
 16-gauge stainless steel top (marine or flat) (except 108" models)
 Flat top

Top extensions (flat edge)

Integral heat shield top
(cut away for viewing purposes)

Cylinder locks

Engineering, Manufacturing & Quality Control

View of front breathing air flow

View of fans on DL84G model

Continental Refrigerator engineers and builds our Griddle Stands to meet the most stringent specifications demanded by consultants and service operators. All cabinets are constructed of top quality materials and components, attributing to their genuine ruggedness and durability. Our Griddle Stands are designed with enhancements to endure everyday use in typical commercial kitchen environments.

Prior to factory shipping, all models are performance-run tested for a minimum of 12 hours, providing a highly sophisticated temperature analysis recording, exclusive to each individual cabinet. This recording is then supplied, along with the unit's operation manual, for the customer. A final leak test, vibration check, noise level and visual examination is made by our quality control team, to assure a superior product is shipped from our factory.

Front Breathing Air Flow

Intake air is drawn through the louvers at the bottom half of the front grill, and then through the condenser coil. Unique forced air design utilizes fans across the back of the unit for even distribution of cold. In cases where the rear of the unit is blocked, the air is forced to discharge through the holes at the top half of the front grill.

Number of Fans

D36GN	1	
D48GN	1	DL48GF 2
D60GN	2	DL60GF 2
D72GN	2	DL72GF 2
