

Dunnage Racks

What

Who

How

Dunnage racks are strong, elevated storage shelves that organize inventory and maximize space while protecting stored products.

These versatile racks are ideal for commercial kitchens, storage areas, warehouses, retail settings, and walk-in coolers or freezers.

Dunnage racks elevate items like food products, inventory, or supplies, promoting better sanitation and organization. By keeping items off the floor, they are protected from moisture, dust, or potential damage from pests.

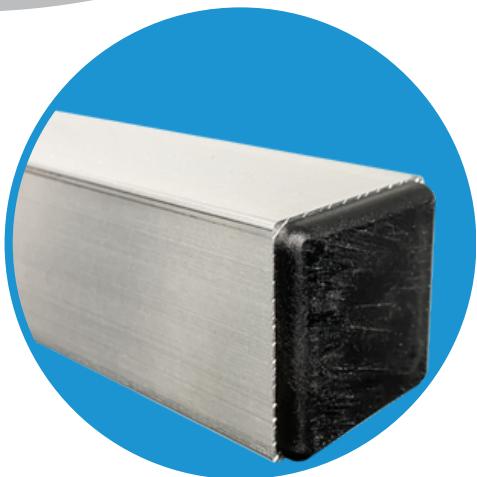

Did You Know?

Aluminum resists rust and corrosion, even in cold and damp environments. This makes aluminum dunnage racks a perfect choice for keeping inventory organized and protected inside walk-in coolers and freezers.

GOOD, BETTER, BEST!

NEWAGE
INDUSTRIAL
INC **WAGE**

CUSTOM DUNNAGE SOLUTIONS

QUESTIONS TO ASK

- Anticipated weight capacity required?
- What size is needed? (length, width, height)
- What will be stored on the racks?
- Do you need a cover (solid, perforated)?
- Does the Dunnage Rack need to be mobile?
- Any Ergonomic Considerations (handle height, turning radius)?
- Where will the Dunnage Rack be used? (warehouse, walk- in cooler, retail floor, etc.)
- If quoting space or a cooler, what are the dimensions of the space/cooler?
- Are there any specific local health code regulations you're aware of regarding the storage of food items on shelving units?

CUSTOMIZABLE FEATURES

- Length, Depth, Height
- Solid & Perforated Covers
 - Removable or Welded
- Casters
- Removable Handle
- Number of Feet
- Center Supports for Increased Weight Capacity
- Grip tape
- Various Storage Solutions with Dunnage Base
- Tow Loop with Drag Hook
