

### Handy Knows Crab...Our History

Handy is America's oldest seafood processor and has consistently maintained the highest quality standards in the seafood industry for over 100 years. Handy was established in 1894 and its original plant in Crisfield on Maryland's Chesapeake Bay still processes soft crabs and other crab products. We continue to be a family-owned company with a focus on quality and transparency.

### Simple...Pure...Delicious

With each new product we introduce, we continue our focus on quality, great flavor and the use of the finest ingredients. Our crab recipes feature only fresh crab meat and you will not find long lists of complicated ingredients on our packages. We are proud to have introduced the world's first and only certified gluten free crab cakes.

### Sustainability

In order to conserve resources in the U.S. and to respond to the growing demand for healthy seafood products, we expanded our sourcing and processing to Asia and Central America where fresh seafood is available year round. We manage our plants abroad with the same care and attention to detail that we use at home and maintain close control of every aspect from sourcing to production.

**Created with the finest ingredients...**
