PROTECTS FROM:

VIRUSES

BACTERIA

PESTS

GASES

ODORS

Stop Floor Drain Odors The Right Way.

Proven. Patented. Effective.

Prevents coronavirus and other viruses, bacteria, gases and pests from entering your home through floor and shower drains

Eliminates need for continuous wasted water and high utility bills caused by dripping water from trap primers

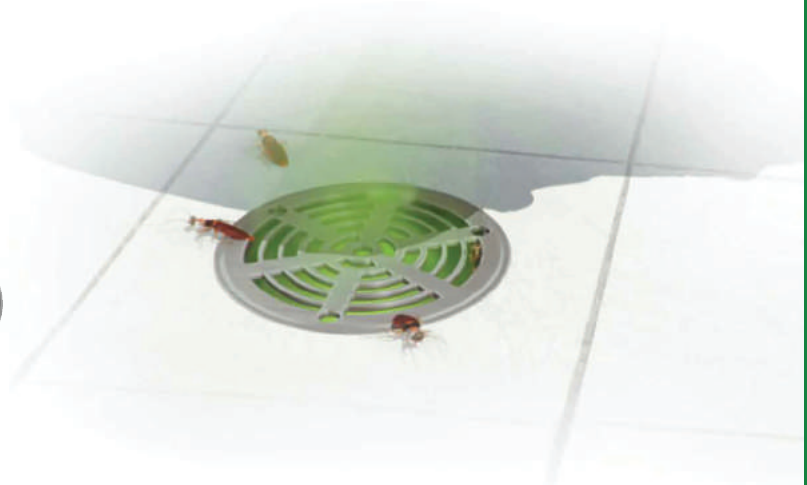

Figure 1

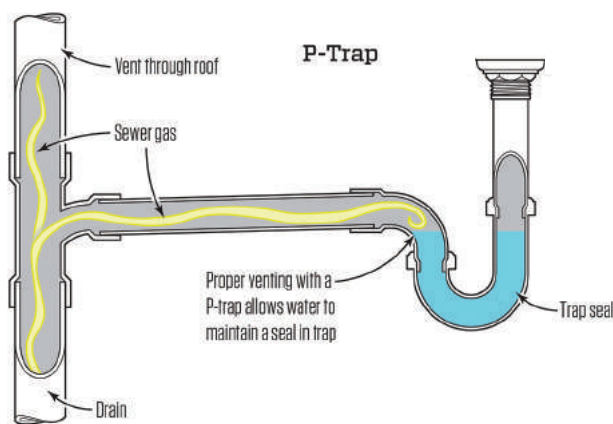

Figure 2

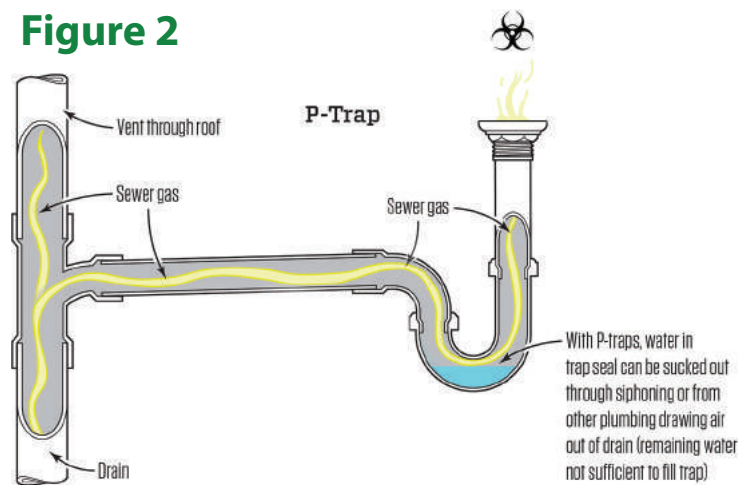

Figure 1: P-Trap Operation.

All drains to a sewer system have a "P" shaped trap that is usually filled with water. The trap provides a seal to keep out sewer gas.

Figure 2: P-Trap Failure.

If your floor drain is rarely used, water evaporates from the trap over time. Eventually, the seal is eliminated, allowing sewer gas (and smell) into your facility. Maintaining water levels within the P-Trap is crucial to odor management. When the water level in a p-trap is challenging to maintain, an odor-proof Green Drain is recommended.

Figure 3: Green Drain Waterless Trap Seal

Figure 4: Green Drain Insert stops odors, pests, pathogens, and gases

Recommendation

1. The Green Drain lessens maintenance time and water consumption by allowing you not to worry about constantly saturating the P-Trap with water.
2. Periodically cleaning of the floor drains between the floor and the p-trap. Using a bio enzymatic bacterial cleaning agent that digests organic matter.
3. The use of a Green Drain will help eliminate drain hazards when proper or regular p-trap saturation is challenging.

What Are Your Drains Letting in?

- **Pests** that infect food supplies, guest rooms, dining areas, and common areas with bacteria
- **Pathogens** that spread aerosol, foodborne and waterborne diseases
- **Sewage Odors** and **Backflow** that affects your reputation and supplies
- **Toxic Gasses** that put guest and staff at risk
- **Hygiene** and **Sanitation Risks** costing monetary and reputation loss

The Green Drain Advantage:

- Proactive protection from all Sewer Contaminants
- Allows Installment or Removal by anyone in seconds
- Boosts facility Sustainability by requires Zero water or harsh chemicals
- Maintenance-Free
- Saves you from unneeded expenses
- Elevates Sanitation as a HACCP/NSF certified product
- Eliminates vulnerability from faulty P-trap
