

PROTECT·A·BED®

Create the Ultimate Healthy Sleep Zone for Your Guests in 3 Easy Steps

With Viral Barrier Protection

Step 1: Install A Mattress Encasement

Defend against bed bugs, dust mites and more; extending the life of the mattress and preventing costly remediations.

Install the encasement once with no need to remove when used with a mattress protector. Don't forget to encase the box spring and sofa bed too.

Step 2: Install Mattress Protection

Waterproof Miracle Membrane® coupled with our Viral Barrier mattress protectors protect against viruses, allergens, dust mites, and liquids, providing you with the ultimate protection for your guests.

Mattress protectors install just like a fitted sheet and easily remove for washing upon guest checkout. Add a mattress pad for extra protection between the sheet and the protector.

Step 3: Add Pillow Protection

Waterproof Miracle Membrane® pillow protectors coupled with our Viral Barrier creates a healthy sleep zone for you and your guests. Launder each pillow protector upon checkout avoiding the need to wash pillows separately.

Sleep Comfortably, Sleep Confidently
