

PALLET RACK BOLTED TEARDROP UPRIGHTS

The Interlake Mecalux assembled selective bolted pallet rack upright frame provides versatility for warehouses that have wide varieties of product types.

It is manufactured from high-strength steel and other quality raw materials. Teardrop perforations on the face of the column allow shelf adjustment at 2" increments.

Tear Drop Upright Column

- 14 GA rolled formed upright column.
- Simple shelf adjustment at 2" vertical intervals with tear drop punch design.
- Side perforations are used for accessories such as row spacers and column protectors.

Bolted Strut Connection

- Bolt connections on frame components are Grade 5 and zinc plated.
- Limited thread bolts prevent over-tightening.
- Nuts with a serrated flange remain securely fastened, with no need for maintenance.

Foot Plate

- Bolted foot plate for unit stability and floor anchoring.
