

Keurig® Descaling Solution

KEURIG
COMMERCIAL

Product Features

Keurig® brewer performance matters! Descaling is an important process that removes calcium deposits, or scale, that can build up inside a brewer over time. Calcium and scale is non-toxic, but left unattended, it can hinder your brewer's performance over time. Descaling should take place every 3 to 6 months to preserve the long-term health of your brewer.

- Helps extend the life of your brewer (when used regularly)
- Removes calcium deposits that can build up inside your brewer
- Descaling is recommended every 3 to 6 months

Compatibility: Compatible with all Keurig® K-Cup® Pod brewing systems
