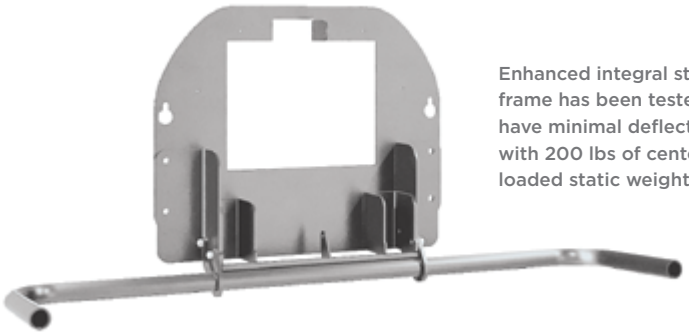
Whatever Your Restroom Needs Are, Koala Has the Solution.

The new KB300 series of baby changing stations offers an array of models to meet any facility's needs for performance, fit and aesthetics.

We incorporated feedback from architects and end-users to develop product enhancements that improve durability, performance and visual appeal, such as:

- **A variety of standard and custom colors and finishes**
- **Microban® product protection**
- **Integral frame for enhanced strength**



Enhanced integral steel frame has been tested to have minimal deflection with 200 lbs of center-loaded static weight.

The 310-54 Stainless Steel Bag Hook safely keeps diaper bags off the floor for easier access during changing.
