PIT+PLUS®

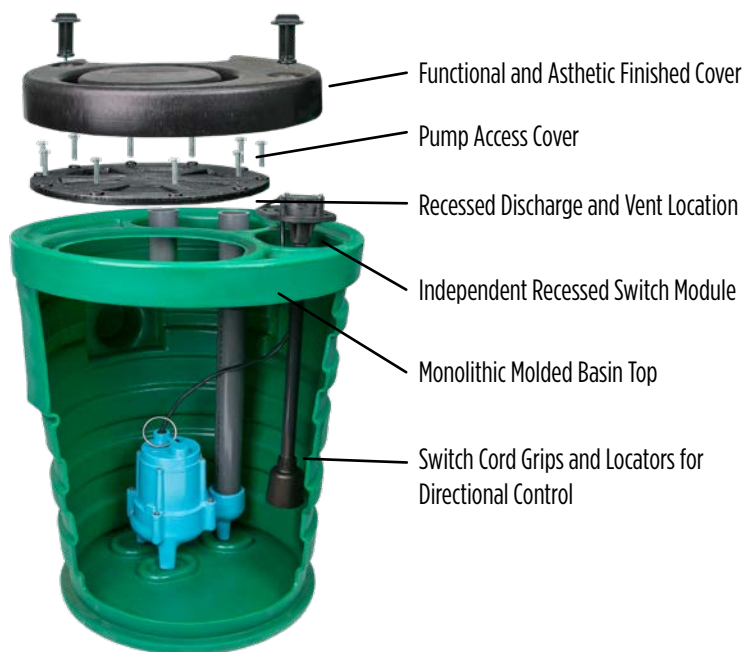

PREMIUM SIMPLEX SYSTEMS

Welcome to the most advanced and contractor-friendly sewage basin in the industry! The Pit+Plus® basin features a separate pump and ECM™ (External Control Module) switch access cover, while incorporating molded-in discharge and vent ports for simplified service and installation. This allows the contractor to access the pump and/or switch independently without disruption to the plumbing connections, saving time, money, and mess.

PIT+PLUS® PREMIUM SIMPLEX SYSTEMS

FEATURES

The systems include either a standard tethered float switch or an ECM™ (External Control Module) switch that uses a 'bell' inside the basin to monitor liquid level for operation of a switch outside the basin (in the cover) and isolated from liquid. This reduces any chance of water intrusion, which can result in switch failure. No moving switch parts inside the basin eliminates failure from 'hang-ups'.

Always Included:

- Molded inlet hub
- Molded anti-torque stops
- 360° molded handle
- Integrated anti-flotation collar
- Stainless steel fasteners
- Optional alarm versions
