

## Multi-Purpose Drop Boxes

Multi-purpose drop boxes are mainly used for short-term storage of items. The wide deposit slot located on top of the lock box allows personnel to drop off important flat items up to 8.5 inches in width into the locked compartment, which can then be picked up later by authorized users with key access. Designed to provide a secure way of locking up important items such as suggestion slips, ballots, mail, documents, keys, money, and more. The key lock ensures that only approved key holders can gain access.
