

CHILL SOUPS AND STEWS QUICKLY AND
SAFELY FROM THE “INSIDE-OUT”

Polar Paddles

Quickly & Easily Cool Foods

This cooling paddle is a great way to rapidly cool soups and other foods that can't go into a blast chiller, especially in taller stock pots and large batches. Its smooth exterior makes it easy to remove foods to reduce waste, while also ensuring the paddle is easy to clean and sanitize.

Rapidly Cool Foods

Perfect for rapidly cooling soups and other foods through the temperature danger zone (41°F-135°F / 5°C-57°C) that can't go into a blast chiller.

Tethered Cap

Adds convenience and ensures it never gets lost or mistakenly thrown out.

Durable Construction

Made of durable polycarbonate to stand tough against freezing-heating cycles.

Convenient Freezing Solution

The wide mouth design makes it easy to fill with ice and water for immediate use and eliminates the need to wait for the paddles to freeze.

HACCP Compliance

Key component in helping your kitchen maintain HACCP compliance.
