

# SELF-EXTINGUISHING VESTS

## Self-Extinguishing Vests

Self-extinguishing vests are polyester vests that are treated with a flame retardant. These vests provide protection against incidental sparks. These garments are not flame resistant as defined by ANSI/ISEA 107-2015 Section 105. Not designed for Arc Flash.

*Applications: For use with the likelihood of sparks, incidental contact with hot machinery, and non-arc flash applications.*
