

# STEELVAC™ ESSENTIAL CARAFE

The SteelVac™ Essential Carafe features an unbreakable stainless liner with vacuum insulation that retains hot or cold temperatures for 4–6 hours. It works with a push-button lid or a brew-thru lid (FVPBTL) for a versatile brewer-to-table presentation. The push-button lid allows liquid to flow under, not through it, and can be easily taken apart for thorough cleaning. Three sizes available.

Seamless chamber vacuum  
for a sleek exterior.
