USB-C: Universal Connectivity

The USB Type-C connector (also called USB-C) has become commonplace on electronic devices we use every day, including laptops, tablets, smartphones and even desktop computers. Like previous generations of USB, USB-C connectors can transfer data and power. But they're smaller, reversible, support faster speeds and deliver more power, opening up many new applications. With USB-C, a laptop or tablet can recharge, output ultra-high-definition (UHD) video, connect old or new peripherals, and transfer files at speeds up to 10 Gbps—all through one tiny port. Tripp Lite USB-C solutions make the most of your device's USB-C ports, providing powerful functionality and convenient portability.

Quick Guide to Key Features

Power Delivery (PD)

Power delivery (PD) technology passes through up to 60W or 100W (depending on model) from a USB-C charger to a connected laptop or other device. This is especially helpful for devices with only one USB-C port.

DP Alt Mode Video Output

DisplayPort Alternate Mode (DP Alt Mode) allows a compatible device to output HD (1080p) or UHD (4K) video through a USB-C adapter, adapter cable or docking station to an external television, monitor or projector without installing special software drivers.

Audio Support

Adapters with HDMI output also deliver digital audio. Some docking stations also include a separate 3.5 mm audio output.

Thunderbolt 3

Thunderbolt is a signaling standard developed by Apple® and Intel®. Tripp Lite's USB-C solutions are compatible with Thunderbolt 3 ports.*

*Applies to devices like computers, tablets or smartphones, not separate displays.

Extra USB Ports

Adapters, docking stations and hubs with extra USB ports can connect peripherals and other devices, such as printers, external drives and smartphones.

USB 3.1 Gen 1 / Gen 2

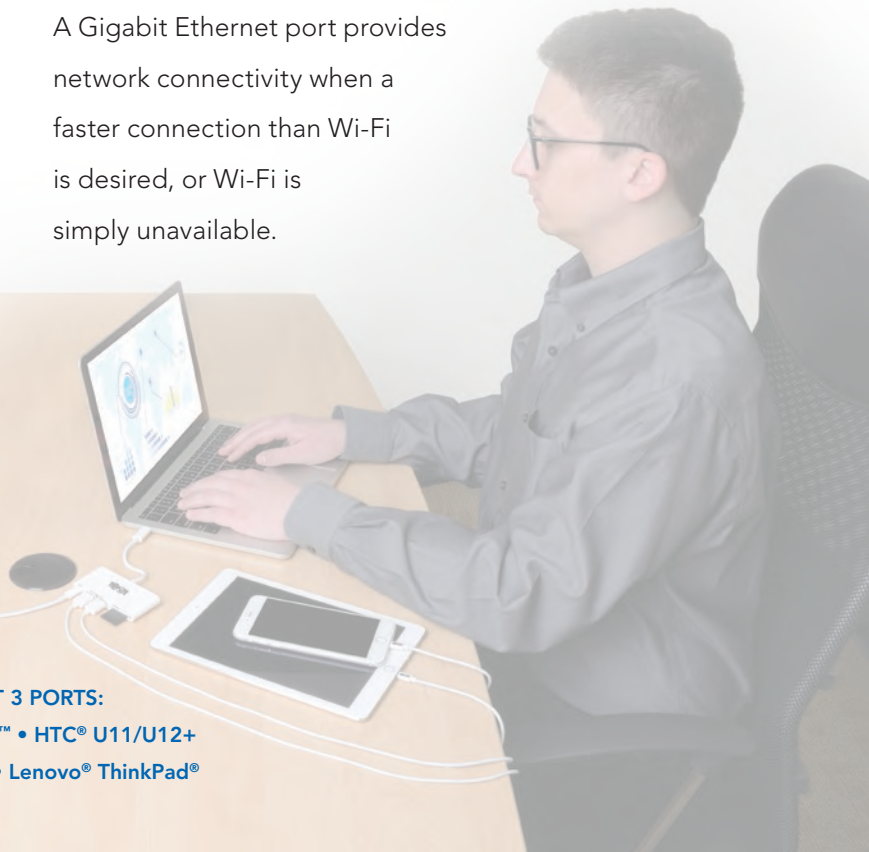

USB 3.1 Gen 1 is equivalent to the USB 3.0 standard, supporting data transfer speeds up to 5 Gbps. USB 3.1 Gen 2 supports speeds up to 10 Gbps.

Gigabit Ethernet (GbE)

A Gigabit Ethernet port provides network connectivity when a faster connection than Wi-Fi is desired, or Wi-Fi is simply unavailable.

PERFECT FOR THE LATEST DEVICES WITH USB-C OR THUNDERBOLT 3 PORTS:

**MacBook® • MacBook Pro® • iMac® • iMac® Pro • Chromebook™ Pixel™ • HTC® U11/U12+
