# Leaf Plus

Plant-Based Oil Resistance

Real Leaders  
Eco Innovation Award

ChemForward  
Safer Designation

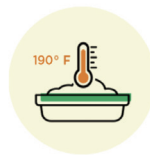

Leaf Plus® is World Centric's patented alternative solution to replace PFAS chemicals for grease resistance in molded fiber products.

Leaf Plus is a first in the marketplace and is available on select high-volume fiber products. Leaf Plus is a plant-based additive used in the production of molded fiber products, completely free of bioplastic. It has also received a Real Leaders award in Eco Innovation and the **ChemForward Safer** designation, assuring that it is not a regrettable replacement for PFAS. Learn more at [worldcentric.com/leafplus](https://worldcentric.com/leafplus).

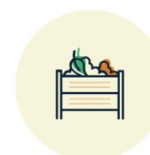

## Key Benefits

**Sustainable Materials**  
Composed of plant-based ingredients with no added PFAS

**Performance**  
Provides oil and grease resistance for temps up to 190° F

**Compostable**  
Meets testing standards for home and industrial compostability

Per- and Polyfluoroalkyl Substances, commonly referred to as PFAS, have traditionally been used for oil resistance in molded fiber products. The use of PFAS in foodservice packaging is now banned in 11 states including California and New York, with many more states looking to regulate them in the near future. Learn more on our Legislative Looks page where we are tracking legislation related to the foodservice industry, [worldcentric.com/legislation](https://worldcentric.com/legislation).

World Centric is addressing these bans by introducing new SKUs which contain no added PFAS chemicals. The current catalog contains all PFAS free items and confirms our commitment to producing safe and sustainable products for our customers without sacrificing compostability. The PFAS free SKUs are denoted by ending letters as follows:

SKU Ending	Oil Resistance Details
-LF:	Product does not have any oil resistance, e.g. fiber lids which do not need oil resistance
-L-LF:	Oil resistance is provided by PLA lamination
-LFP:	Leaf Plus®, World Centric's patented, plant based compostable solution for high temperature grease and oil resistance
-LFS:	Industry PFAS free solution, suitable for use with food below 140°F (may work at higher temperatures as well)
