Keypad Depository Safe

Depository safes or drop safes are an important tool in safe guarding items from thieves and/or employees. Instead of leaving large bills inside the register simply drop the items of value into the access portal in the safe where it stays safely out of reach. This makes dropping items into the safe simple for businesses that need to protect their deposits before they need to go to the bank. In the situation that years have passed and the batteries need to be replaced or have forgotten the numeric key codes, back-up keys are included with Barska safes.
