

## **Webstaurant BUNNserve Pricing – 1/1/24**

### **Flat Rate Installation**

Includes labor, travel and standard installation materials for one site visit to install and calibrate BUNN® Beverage Equipment to customer provided specifications during normal business hours (8:00 AM – 4:30 PM, Monday – Friday). Labor for installation of water filtration is also included if the filtration components are on-site at the time of the installation or arrive with the equipment. Cost of filtration components is not included.

Standard installation materials include beverage tubing and common plumbing fittings required to connect equipment to appropriate, existing, plumbing utilities that meet local building codes and manufacturer's installation requirements. Water line connections must be within 6 feet of brewer placement and have available tees or valves for connection. BUNNserve installers cannot cut or "sweat" copper fittings on water lines. Product lines for auto-fill or sweetener applications must be routed from product storage area to desired equipment placement location prior to installer's arrival. Unless specifically included in a quotation, brix pumps and CF valves or accessories are not included. Installations requiring water and product lines to be run further than 6 feet, through walls or ceilings are not available at Flat Rates.

Appropriate electrical outlet must be within 4.5 feet of brewer placement. Brewers will be installed utilizing 120 Volt cord-set as shipped. An additional charge of \$40 applies for Installations requiring 120/240 Volt cord-sets. Installations requiring equipment to be "hard-wired" to an electrical connection are not available at Flat Rates.

Modification of site structures such as cabinets, counters or shelves is not included.

All utilities must be in place upon installer's arrival. A \$160 Failed Installation Attempt Fee will be invoiced for installations that cannot be completed during the first visit due to lack of site readiness.

Installations are typically completed within 10 days of request, based on equipment availability and site readiness. Lead times may be longer for installations of multiple units or projects with multiple locations within the same geography.

Flat Rate Pricing is not available for the following: Large venues such as airports, stadiums, and arenas; locations that conduct security screenings or have limited or restricted access; remote locations that are accessible only by boat or air travel.

*BUNNserve services are performed by BUNN Authorized Service Providers or BUNN Factory Representatives. Selection of servicer is at sole discretion of BUNNserve.*
