

## Customizable Panel Instruction Guide

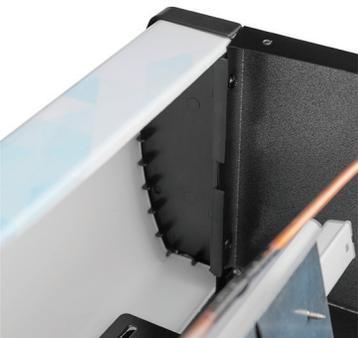

1. Unscrew all screws (6) from the top of the unit.

2. Unscrew the (3) screws on the back of the unit connected to the top panel.

3. Remove the top panel.

4. From the inside of the unit, unscrew the (2) screws from the left side end cap and remove the end cap.

## Customizable Panel Instruction Guide

5. Pull the panel out of the right-side end cap by pulling the panel to the left.

6. Replace the old panel with the new panel by sliding it into the right-side end cap, and making sure the bottom goes around the hinge.

7. Re-attach the left-side end cap and top panel by replacing and attaching the previously removed screws.
