

Using a black & white photo copier is the fastest most cost effective way to produce your menu. If you don't have a copier Staples or any copy center will gladly produce for you for pennies a copy. You can also print your copy from your PC printer as well adding color to your headlines. Just load your paper tray with our full color menu paper.

Print out your completed document in black and place in copier for copying. Load our menu paper in the paper tray and copy your text onto our full color professional looking menu paper. A couple of attempts may be needed for positioning.

assembly instructions

Place menu jacket on flat surface. Keep edge of paper parallel to binding, spread fingers, apply slight pressure toward end of sheet & slide forward slowly while holding cover with other hand.

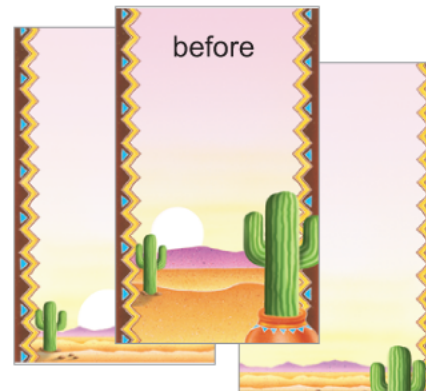

STOP ... If paper starts to twist, slide paper out and start over. Do not force paper into jacket, it will cause paper to wrinkle or tear.

With our **Do-it-Yourself** Menu Paper your menus can have a professional look for a fraction of the cost.

All papers are available individually or as a complete set including a cover page, inside left and matching right and for trifold menus a matching middle page.
