

Dimensions shown are actual physical dimensions. Additional clearances to built-in cabinetry are dependent on the tolerances of the cut-out. We recommend an additional .250 inches around all side openings. An additional .500 inches is recommended for the top to allow for levelling of the fridge. Openings can be reduced if the tolerances are controlled.

1.625
If installed in cabinetry, the door must protrude out from the face of the cabinetry by approximately this dimension to allow for the swing of the door.
