A. UNPACKING

Check that the kit includes all the correct parts and quantities for the kit purchased as listed above.

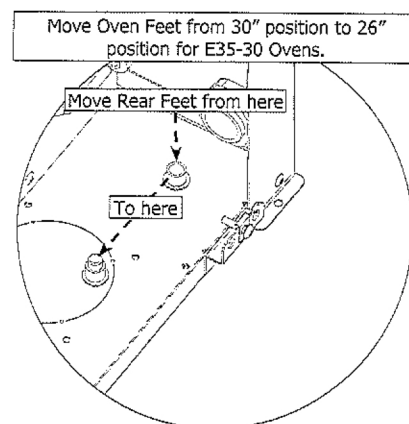

B. FITTING OVEN TO HOLDING CABINET

1. Remove the 4 screws and cup washers from top panel of holding cabinet.
2. Screw the 4 Oven Stacking Pins - P85 (supplied with the holding cabinet, Part No.239758) into the top of the holding cabinet.
3. Remove the oven side panels, each side panel is held on by 4 screws.

NOTE: For E35-30 Ovens, move the rear feet from the 30" foot position, forward to the 26" foot position.

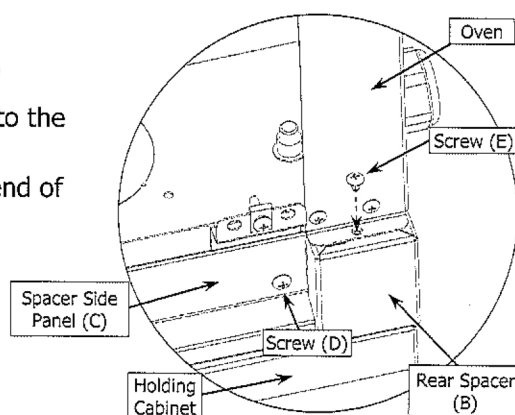

4. Place the oven on top of the holding cabinet, locating the oven feet over the 4 pins fitted to the holding cabinet top panel (refer Item 2 above).

For E35-26 Ovens

When fitting an E35-26 Oven onto a P85 Holding Cabinet. (Note position of Rear Spacer Screw (E)).

1. Fit Front Spacer (A) and Rear Spacer (B) and secure the oven to the spacers with Screws (E) at each corner of the oven.
2. Fit Spacer Side Panels (C) and secure with Screw (D) at each end of panel.
3. Tighten all screws on the stacking assembly.
4. Refit side panels to the oven using original screws.

For E35-30 Ovens

When fitting an E35-30 Oven onto a P85 Holding Cabinet. (Note position of Rear Spacer Screw (E)).

1. Fit Front Spacer (A) and Rear Spacer (B) and secure the oven to the spacers with Screws (E) at each corner of the oven.
2. Fit Spacer Side Panels (C) and secure with Screw (D) at each end of panel.
3. Tighten all screws on the stacking assembly.
4. Refit side panels to the oven using original screws.
