### 1 Undershelves

Referencing numbers on posts, snap plastic tapered split sleeves onto each post (two longest posts go in the back and two 33" in the front) at desired location of undershelf. The thicker part of the taper goes toward the bottom. Refer to **figures 1 and 2**. Make sure rib on split sleeve is seated into a groove on the post. Lower the shelf onto the posts until the plastic tapered split sleeves are snugly fitted within the shelf collars. Repeat this step for second undershelf. Refer to **figure 3**.

**Note:** The wider wire shelves are the undershelves. The narrow wire shelves are the overshelves.

### 2 Stainless Steel Tabletop

Snap the plastic tapered split sleeves onto the very top of the shorter posts. Be sure that the plastic tapered split sleeves get snapped to the same groove on the longer posts. Lower the tabletop over the longer posts until the tabletop is seated snugly on the split sleeves. Refer to **figure 4**.

For units with overshelves continue with steps 3 and 4.

### 3 Units with Overshelves

Bolt the two 21" or 29" posts onto the table top. One end of these posts has a nut welded in it. This is the end for the bolt. Refer to **figure 5**.

### 4 Overshelves

Referencing numbers on posts, snap plastic tapered split sleeves onto each post at desired location of overshelf. The thicker part of the taper goes toward the bottom. Make sure rib on split sleeve is seated into a groove on the post. Lower the shelf onto the posts until the plastic tapered split sleeves are snugly fitted within the shelf collars. Repeat this step for second overshelf. Refer to **figure 6**.

### 5 Seat Shelves

Securely seat all shelves by lightly tapping with a rubber mallet to secure shelving to split sleeve and post.

**Note:** Follow similar steps outlined per purchase configuration options.
