

Unique Features of the Evolution Elite®

ELECTRIC & GAS FRYERS

HENNY PENNY
Engineered to Last

The Henny Penny Evolution Elite fryer was designed to offer operators a way to reduce the actual cost of frying. After thousands of installations, we've learned how much operators appreciate some of the unique benefits you can only get with Evolution Elite electric or gas fryers.

- Uses 40% less oil at fill (30 lbs)
- Sensor-activated automatic top-off feature replenishes oil
- Smart Touch Filtration™ with the push of a button in fewer than 4 minutes
- Energy saver mode allows automatic energy savings when not cooking

Easy Operation

- A QUICK FILTER PROCESS:** Filter individual vats on the fly in about 4 minutes with easy one-button request/confirm.
- B AUTO TOP-OFF:** Sensor-activated Oil Guardian™ automatic top-off feature replenishes oil from J-I-B.
- C REMOVABLE BASKET HANGERS:** Heavy-duty basket hangers are easy to use and built for abuse. Individual 0.105 in. (2.7 mm) plate steel hangers located above each well. Removes in seconds. No tools, parts or fasteners to lose.
- D LESS MESS:** Fryer deck slopes in toward vats to keep drips from reaching controls and floor. Makes cleanup easier and floors less slippery.
- E SEAMLESS LANGUAGE CHANGE:** Only two key strokes to change language back and forth on control display. Great productivity enhancement for mixed-language crews.
- F EASY-ACCESS PAN:** Compact, easy-to-maneuver filter pan on four casters. Rolls out smoothly for normal cleaning, filter media change-out and oil disposal.
- G COVER STORAGE (ELECTRIC MODEL ONLY):** Convenient onboard storage for night covers with 3- and 4-vat electric models. Set covers inside the fryer on rack in the open area under left-side vats.
- H USER-FRIENDLY CONTROLS:** Operator-friendly controls feature easy-to-read display, larger text size and larger, more separated touch keys.

Reliability

- I NO-HASSLE SERVICING:** Engineered for ease of serviceability with clean, well-organized component area and easily accessible components. Parts are easy to change out, common ones require no tools.
- J USB CONNECTION:** Up front and accessible USB connection allows for quickly updating and transferring product settings or sharing fryer usage data — making it easier to manage multiple fryers.
- K SMOOTH CONTROL SURFACE:** Sealed menu cards preserve smooth, protective control surface. Cards slide in from behind control panel leaving a smooth, clean surface without stickers or pockets that collect dirt, peel off or wear away.
