UNATTENDED MICROSTORES

We saw a problem in 2010...

Fresh food was always behind a long line of people. Vending machines were only filled with sweet, salty, and shelf-stable snacks.

...so we gathered a team...

Our team is comprised of foodservice veterans and FoodTech engineers.

...and we had a vision...

Fresh food accessibility for all people

..and set out on a mission.

Our mission is to democratize fresh food. Creators and consumers use our microstores to break free from traditional hours, costs, and locations.

Today

Our unattended microstores empower organizations from mom-and-pop shops to large foodservice firms around the world.
