

Table Base ASSEMBLY INSTRUCTIONS

1 Piece (Your Base Style)

Parts List:

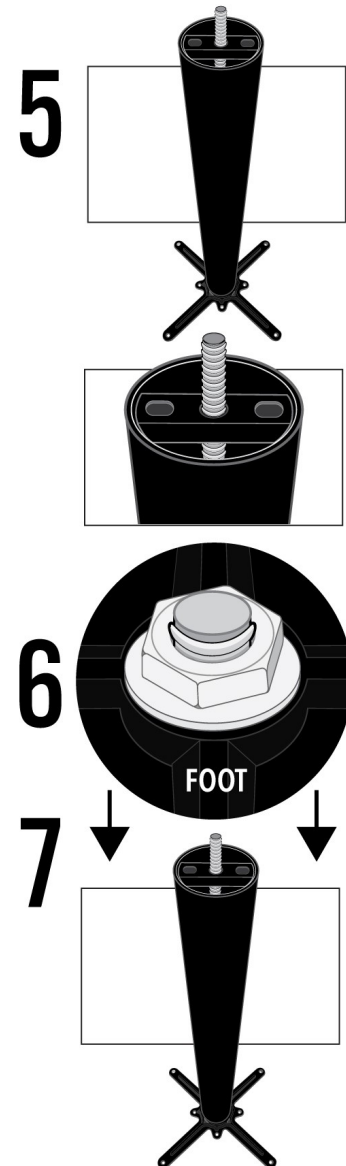

ASSEMBLY

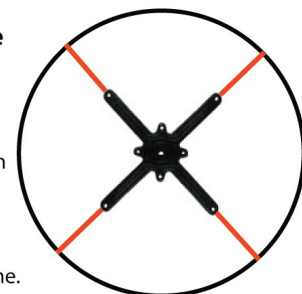

- Slide the column (B) down over the threaded rod. The "tab" on 1 side of the column should lock into one of the grooves in the bottom of the mounting plate, and the threaded rod should come through the cross piece (cross piece not on all bases).
- Place the foot (A) on the column (B), guiding the threaded rod through the center hole on the foot.
- Place the washer (F) and then the locknut (E) and tighten.
- Place your tabletop upside down on the floor, and place the base in the middle. Measure from each end of the mounting plate to the tale edge, adjusting to center the base.

When each measurement is the same , use the screws to attach base to top.

8 Centering the Table Base onto the table top

- Using the *Tick Marks* provided on the side of the instruction sheet, measure from the corner of the table base top to the edge of the table.
- Work your way around, ensuring each corner is the same.
