

OUR COMFORT LASTS **6X** LONGER THAN OUR EVA COMPETITORS

KLOGS® was created for people whose lives are tough on their feet. Our mission is to provide comfort that doesn't quit by using high quality polyurethane materials. Our shoes feel just as good out of the box as the 1000 time you wear them.

In order to validate our mission, we reached out to the experts:

Heeluxe™ employs patented technology to assess the comfort and performance of footwear in conditions that accurately replicate real-world wear.

Heeluxe™ tested KLOGS® against a popular EVA clog with a simulated wear duration of 1 year walking. Here are the results:

“KLOGS® has exceptional cushion durability, ranking amongst the BEST in our database. Their cushioning lasts longer than EVA competitors.”
