

Preserve2Go®

Preserve2Go® is a reusable to-go container on a mission to eliminate the waste of millions of disposable takeaway containers.

Preserve2Go is on the leading edge of a move to reusables. Reusable bags have significantly gained in popularity, and reusable drink containers are enabling consumers to move away from disposable cups. With the Preserve2Go line, we're changing the culture of single-use disposables in food service. Preserve2Go is the only container of its kind made in the USA with 50% recycled polypropylene.

- Made in the U.S.A.
- Made with 50% recycled plastic
- BPA and phthalate free
- Microwave-durable
- Freezer-safe
- NSF certified

- 1000+ uses in food service applications
- The use of Preserve® products in a building may count toward a company's USGBC's LEED credits under Sustainable Purchasing —Ongoing Consumables.

* Our products have been tested for microwave durability by a leading independent certifier and will not break, crack, or overheat when used for reheating foods in the microwave.

**MADE WITH
50% RECYCLED
PLASTIC**
