

FILTER STRAINERS DEFINED BY TYPE

FINE Strainer Filter

The fine mesh strainer is specific to small particle capture. Perfect for coffee grounds, seeds and finer items without grease.

The fine strainer may clog with any fats, oil and grease.

Specific purpose use, only.

STANDARD Strainer Filter

The perforated stainless strainer is our standard filter for general purpose use. Small enough holes (2.5mm) to capture rice but flow through perforation to handle items with grease content.

General purpose approved.
