

Wild Hibiscus grown
whole butterfly pea flowers end batch colors when hot
steeped per gallon of water

Add citrus for color change, final color will depend on
other ingredients (i.e. a cocktail) and pH of liquid.

- 1 cup per gallon of water batch is a concentrate or strong color result that can be diluted as needed for application.
- Very neutral flavor, add a natural sweetener to taste then pour over lemonade for a fun color change effect. Include alcohol to the lemonade first for an adult beverage.
- Mix in front of customer for a fun added visual.
- Add herbs and spices to your butterfly pea flower tea batch for unique flavor profiles
- Large batch out to create high volumes of blue and multicolored ice cubes
- Create large blue ice cube blocks for at the bar, or even ice sculptures
- Create uniquely colored granita's
- Any food application that absorbs moisture can be colored with butterfly pea flowers when cooking i.e. pasta, rice, cracked eggshells etc.
