CONCRETE BUCKET

FEATURES

- ✓ Versatile bucket and riser combination allows for use as a front receiving hopper or floor hopper
- ✓ Offset gate pours columns, slabs, beams, narrow forms and walls
- ✓ Universal fit fork pockets for straight mast and extended range forklifts
- ✓ Discharge gate manually with handle
- ✓ Fabricated with heavy gauge steel and all-welded construction
- ✓ Adjustable chute included

Save the cost of a concrete pump or crane and use your extendable reach forklift with Jescraft's Forked Beam Bucket to place concrete in slabs, beams, or walls, or combine with the Riser to use as a floor hopper to pour concrete in buggies, carts or tubs. The 1 cu. yd. capacity allows placement of significant amounts of concrete at once.
