

KB107, KB108 (Baby Bear), and KB112 (Countertop) REPLACEMENT STRAP INSTRUCTIONS

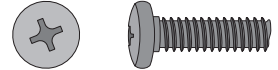

P/N 285-KIT

Hardware Supplied

Two Plastite Screws

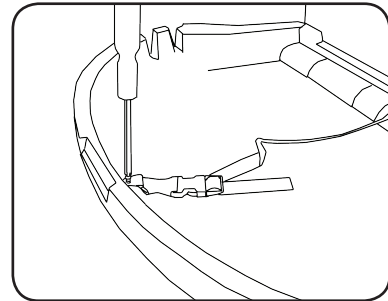

Two 5/8" Phillips Pan Head Machine Screws

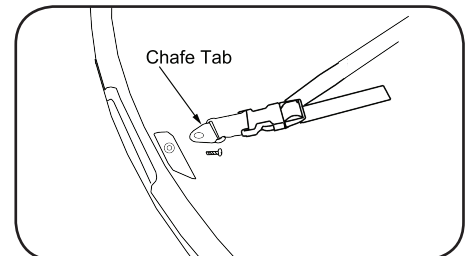

Tools Required:

Phillips Head Screwdriver

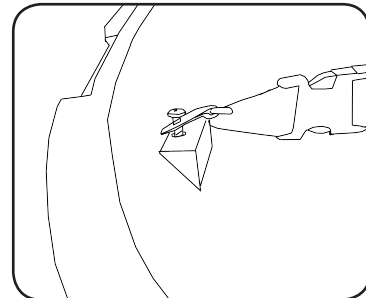

1. Use a Phillips Head Screwdriver to remove the screws securing the old strap. Discard the old strap and screws.

2. Take the new strap and lay it on the unit. For the KB107, position the strap with the short end towards the back of the unit. For the KB108 and KB112, position the strap so that the short end of the strap is towards the front of the unit.

3. Secure the strap to the unit by inserting one of the screws provided through the hole in the chafe tab and into the insert/hole in the front of the unit. Use the Machine screws for the KB107 and KB112 models, and the Plastite screws for the KB108 model.

4. Repeat the previous step for the opposite end of the strap.

5. Clean up work area and close unit.
