# INSTALLATION REQUIREMENTS

- 4 open dovetails between shelves
- NO shelf plates on traverses
- Open space between back of unit and wall: 3" - 5" (7,6 - 12,7 cm)

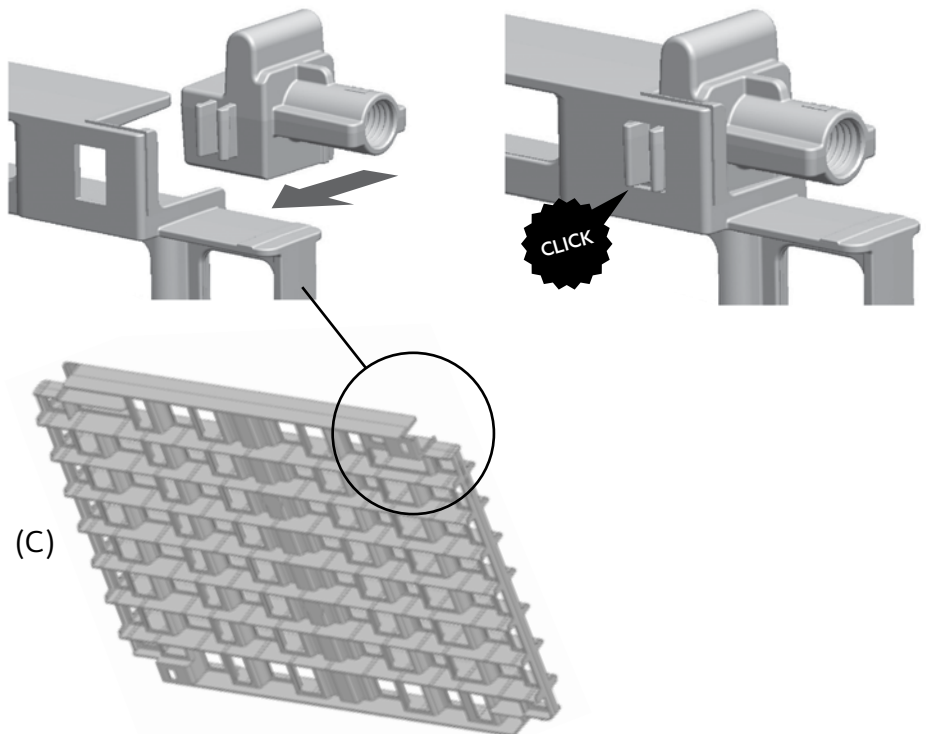

## Step 1

Assemble 1 Rail Panel Bracket set.  
(A and B)

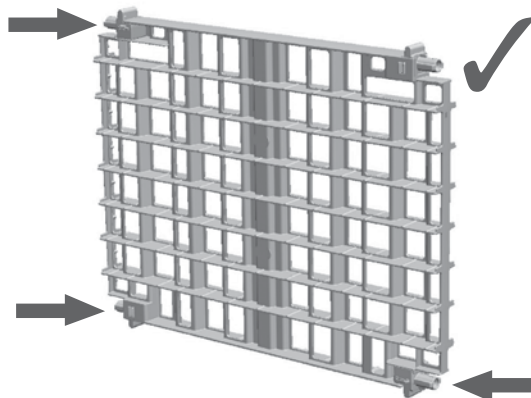

## Step 2

Snap Rail Panel Bracket set  
into Rail Panel (C) Corner.

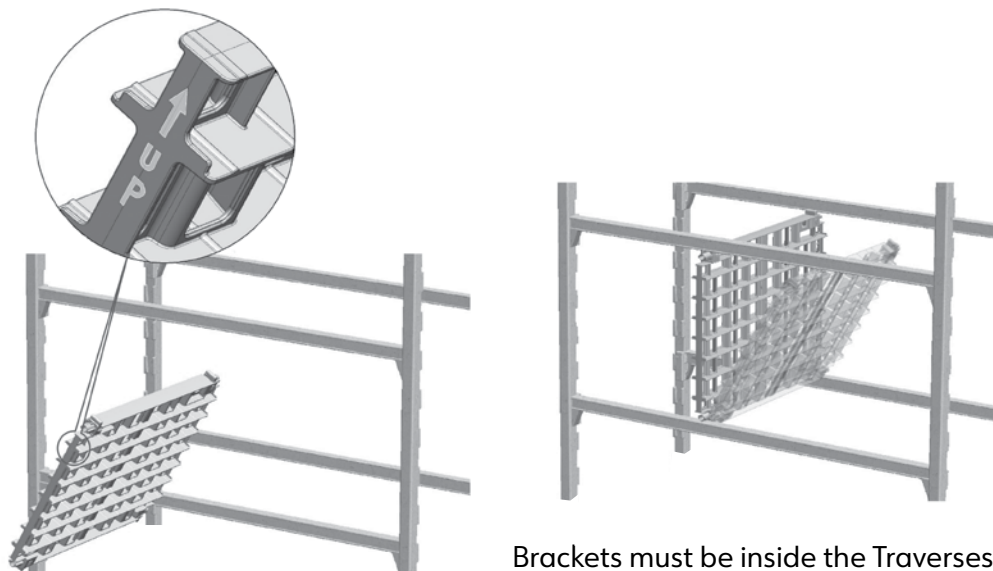

## Step 3

Repeat Steps 1 & 2  
for remaining 3  
corners of Rail Panel.

## Step 4

Place Rail Panel, **pointing up**, between Traverses.

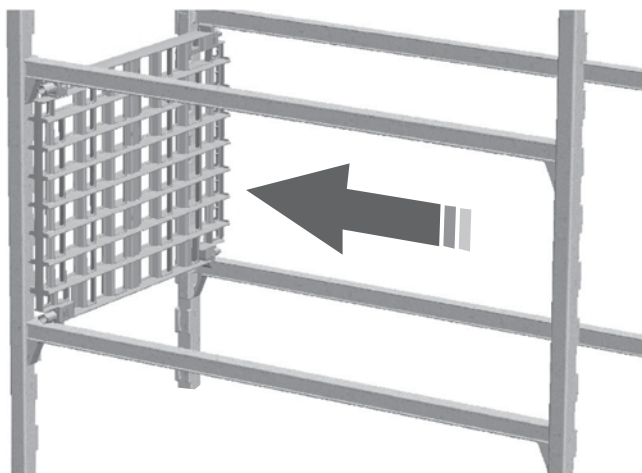

Brackets must be inside the Traverses.

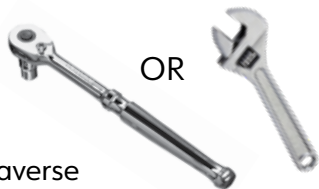

## Step 5

Slide Rail Panel to one side/end.

**Note:** When installing on Elements® Series shelving, the panels closest to the posts will have a tighter fit. Preview the assembly video (see page 1) before starting the panel installation.

## Step 6

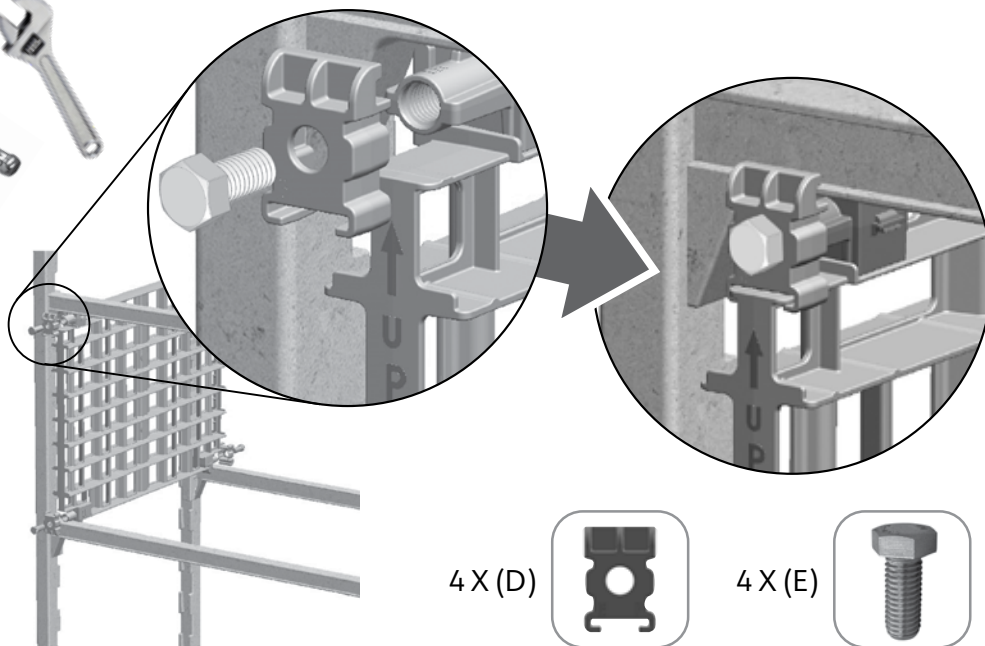

1. Slide each Traverse Bracket (D) onto Rail Panel and Traverse.

2. Install Bolts into front and back Brackets.

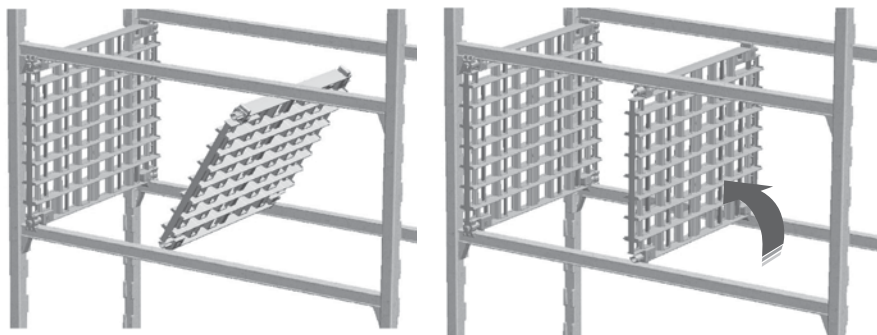

3. Adjust and straighten Rail Panel.

4. Tighten Bolts with tool.

## Step 7

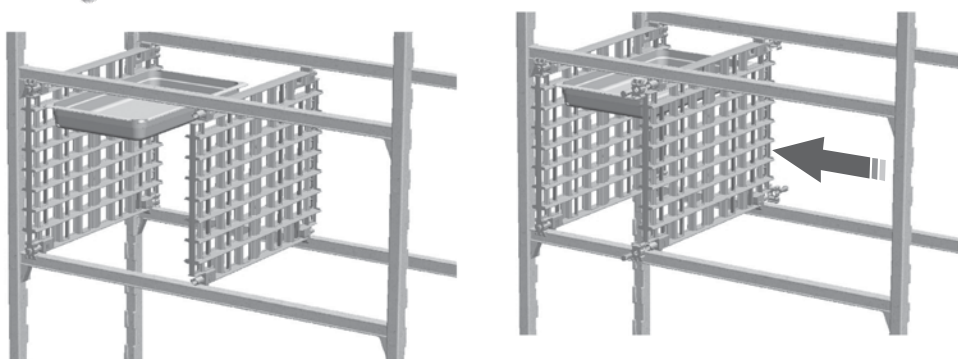

1. Prepare next Rail Panel (Steps 1-3).
2. Install on Shelf Traverses (Steps 4 & 6).
3. Tighten Bolts just enough to hold the rail panel upright on Traverses.

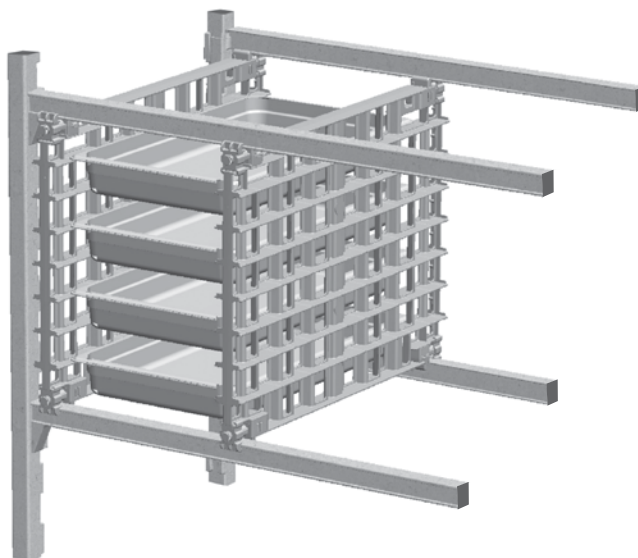

## Step 8

1. Test fit with storage item placed **on top rails first.**
2. Tighten top Bolts with tool.
3. Test fit with same storage item on bottom rails and adjust as needed.
4. Tighten all Bolts with tool.

**TIP:** Inserting a tray, or pan, as illustrated, will more accurately determine the distance needed between Rail Panels.
