Vollrath Company Receives Smallwares and Tabletop Product Honors

Foodservice Equipment Reports magazine recognizes Vollrath products in annual awards program

SHEBOYGAN, WI – September 1, 2016 – Vollrath Company, a leading manufacturer of foodservice equipment and smallwares for the foodservice industry, has been awarded in both categories of the Smallwares & Tabletop Product Awards by Foodservice Equipment Reports (FER) magazine. Six industry professionals served as judges and examined the uniqueness, efficiency, utility, durability and design of nearly 70 entries to select the winning products, which included Vollrath's Cubic Display System in the Tabletop portion and the Extended Handle Ice Cream Spade in the Smallwares portion.

VOLLRATH PRODUCT SPOTLIGHT

Extended Handle Ice Cream Spade

Building on its ice cream utensil offerings, Vollrath's new Extended Handle Ice Cream Spade features an extended length handle (10.175" overall) allowing the operator to easily reach far inside ice cream tubs and gelato pans. The handle is encapsulated with antifreeze, which aids to release the ice cream from the bowl. It also has a hole in the handle for convenient storage. Made of durable cast aluminum, the NSF certified ice cream spade is ideal for scraping down the sides of ice cream pails and smoothing off the top layer of ice cream for serving. Comfortable for right- or left-handed use, the ice cream spade handle is designed with an ergonomic textured for a sure grip.

Cubic Display System

Fusing modern elegance with unparalleled flexibility, Vollrath's Cubic Display System adds efficient sophistication to any buffet presentation. The modern, sleek design of Cubic offers limitless versatility with configuration options that allow you to create the ideal setup for every occasion.

Portable and lightweight, Cubic includes bowls, pedestals, beverage dispensers, cutting boards, platters and more that are easy to combine. With many stackable pieces, the Cubic line saves valuable storage space when not in use and is quick to assemble for a fast buffet setup and takedown. The unique pedestal choices allow for any serving area to be maximized with more vertical presentation options. The system also accommodates standard size steam table pans on applicable products. For more information about Vollrath's Cubic Display System, visit www.vollrath.com/cubic.
