RAMEKING® INSTALLATION INSTRUCTIONS

Thank you for your purchase! Please read the enclosed information to ensure proper installation!

CONTENTS -

			
1 SPINE	1 PLUG (plug will already be glued into the spine).	1 Foot	4 TUBES

STEP 1 - Remove Contents From Box – Make sure you have 4x Tube pieces, 1x Foot piece, and 1x Spine piece with the Plug piece glued in place already.

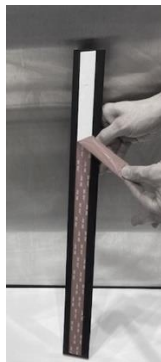

STEP 2 - Clean Installation Area - **Let dry completely.**

STEP 3 - Plan Rameking® Location – 3M™ VHB™ Tape will stick to virtually any surface. Place anywhere you would like to use your Ramkeings®.

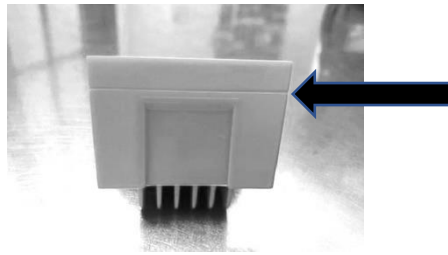

For Inside Cooler Door- Consider obstructions (for example, a commercial cooler door interior has a gasket, therefore the spine needs to be installed 6 inches beneath it).

** When placing multiple Rameking's® make sure you provide ample space in between Spines. They should be placed **at least 1 1/8 inches** apart.

STEP 4 - Remove Tape – Press firmly to secure spine onto surface. 3M™ VHB™ Tape will stick to virtually any surface. Place anywhere you would like to use your Ramkeings®.

STEP 5 - Install Foot – Slide Foot down the Spine.

Note: If using the 1.5oz Portion Cups bend here to snap off the tab.

STEP 6 - Install Tubes – Slide down desired number of tubes.

Scan Here For A Video Of The
Rameking® Being Used.

STEP 7 - Load Ramekins – hold 2 or 3, filled and capped, 2oz (or 1.5oz if it has been adjusted) ramekins between your thumb and index finger. Using the sight line, down the front of the tubes, slide the ramekins down.

STEP 8 - Dispense Ramekins – Using Thumb and index finger, in a “claw”, grasp the ramekin and firmly pull directly towards yourself and up slightly.

TO CLEAN - Dispense all ramekins, then slide pieces off spine (THE PLUG WILL NOT BE REMOVED) and clean with desired cleaning solution. To Clean Spine – Wipe down with desired cleaning solution.

TROUBLESHOOTING – If the door won’t close with the Rameking® installed you may need to move the shelves back into the cooler further.

If the shelves are all the way back and the Rameking® still doesn’t fit, adjust shelf height to accommodate for the desired number of tubes.
