

# re.WARE™ Care & Use Instructions

re.WARE™ is produced using the highest quality, commercial-grade recycled PET plastic. This versatile collection is safe for use in dish machines, microwaves, refrigerators, freezers, and under heat lamps. Follow these easy guidelines to enjoy maximum performance and prolonged life of your investment.

## Basic Care Guidelines

## Care & Use Tips

### General Use:

- **Not recommended for use with steak knives, serrated dinner knives, or steel wool pads, which may cause permanent scratching**
- Microwave use should be for reheating purposes only and should not exceed 2.5 minutes
- Not intended for oven use and/or extended exposure to heat greater than 300°F/ 149°C
  - Avoid extended exposure to stain-causing foods such as tomato, carrot, and curry
  - Do not bang plateware on hard surfaces to remove stuck-on food
- When rinsing or washing by hand, do not scrub with abrasive scouring pads or steel wool
- To remove staining, soak in an oxygen-releasing compound designed for use with plastics, such as Ecolab® Dip-It XP, before washing as usual
- To remove surface scratches, lightly buff with an eraser sponge, such as Mr. Clean® Magic Eraser, before washing as usual

### Dish Machines:

- Do not use corrosive chlorinated or phosphate-based detergents
- Do not use sanitizers in combination with high-temperature dish machines
  - Use a water softener if hard water is present
- Ensure detergent feeders are set within the recommended usage levels
  - Completely empty the rinse water in the dish machine daily
- Remove plateware from dish machine promptly after cycle completion
  - Allow clean plateware to cool before stacking
- Use dish machine racks designed for plateware and do not overcrowd

### Recommended Detergents and Rinse Agents:

- (Speak with your dish machine provider for additional products recommended for use with plastics)
- Ecolab® Solid Power XL, Solid Brilliance
  - Auto-Chlor® Mach Endurance, Mach Detergent 3X, Auto-Kleen M.S.
